DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1 – 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent Application No. 2002/0034943 (Pallonen).

Pallonen teaches the device as claimed, except that there is no explicit recitation of an analog pre-selection network. However, it is doing the same as Applicant's device, i.e. pre-selecting signals. See Paragraphs 0018 – 0021, Paragraphs 0023 – 0024), Paragraphs 0026 – 0033 and 0036. See also, Figs. 1 – 3. If Applicant disagrees, it would have been obvious to one of ordinary skill in the art to pre-select a range of signals through any filtering or any other means as was deemed necessary. Note use of filter 7.

With respect to those claims with multiple switching networks; note Paragraphs 0039 – 0041.

Even if Applicant disagrees that Fig. 4 is doing what Applicant's device is doing, that is using multiple pre-selection networks, the Examiner would are as obvious the duplication of pre-selection networks would have been obvious to one of ordinary skill in the art.

Application/Control Number: 09/896,080

Art Unit: 2642

With respect to claim 16, comparing a code such as correlation codes is old in the art and would have been obvious to one of ordinary skill in the art to use whatever parameter was deemed necessary in the comparing step, such as frequency or bit error rate and the like.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

U.S. Patent No. 6,697,642 (Thomas) - note Figs. and Abstract;

U.S. Patent No. 6,580,358 (Nysen) - note Figs;

U.S. Patent No. 6,405,018 (Reudink et al.) – note Figs.;

U.S. Patent No. 6,118,773 (Todd) - note Figs.;

U.S. Patent No. 5,590,399 (Matsumoto et al.) - note Figs. and Abstract; and

U.S. Patent No. 5,410,733 (Niva et al.) - note Figs.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bill Deane whose telephone number is (703) 306-5838. In addition, facsimile transmissions should be directed to Bill Deane at facsimile number (703) 872-9306.
